

AI Use Guidelines for Computer Science Students (2026)

Instructor: Dr. Jim D. Pham | Course: All Programming Classes

AI Acceptable Uses

- **General Queries:** Students are encouraged to use AI for thorough explanations and concise summaries of course topics to enhance their understanding of the material.
- **Assignment Assistance:** AI can offer valuable hints and guidance to help students think critically about their assignments, promoting learning without providing complete verbatim answers.
- **Code Debugging:** AI serves as a helpful resource for troubleshooting and debugging in coding tasks, enabling students to refine their coding skills and improve their problem-solving capabilities.

Suggested Tools

You may choose AI chatbot tools, like:

- **ChatGPT** (OpenAI)
- **Claude AI** (Anthropic)
- **Gemini** (Google)
- **Copilot** (Microsoft)
- **DeepSeek**
- **Perplexity**
- Other

Unacceptable Uses

- **Verbatim Submissions:** Copying and pasting AI-generated code directly into your lab assignments or worksheets is strictly prohibited.
- **Assessment Support:** Using AI tools during Chapter Quizzes, the Midterm Exam, or the Final Exam is a violation of academic integrity. All exams must reflect your own individual work.
